## Symphony No. 2.

You're the conductor! Choose up to 6 instruments to put in the orchestra pit and hear them play together. Then change up the instruments and hear the musical transformation.

## **FUNCTIONS**

I. ORCHESTRA PIT

This is where the magic happens. Choose up to 6 instruments to place in the pit, then press PLAY. If you choose the flute, drums, xylophone, piano, cymbals and violin to play Alouette, that's exactly what you'll get. Switch the piano for the trumpet and the same song will sound totally different .Try playing Twinkle Twinkle with xylophone and piano for a relaxing lullaby, or if you prefer to go marching around the house, use the trumpet, drums and flute instead. There are 7 instruments and 15 songs—tons of musical combinations!

2. ON/OFF SWITCH

Press to turn on or off. If you don't keep playing after a song is over, the symphony goes to "auto-off" sleep mode — to save the artistic mind that's too wrapped up in the music (and save the batteries, too).

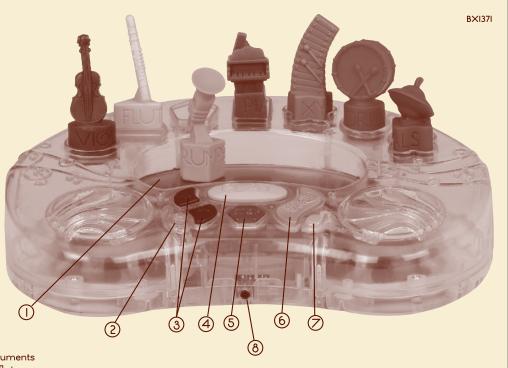

3. VOLUME CONTROL
Play fortissimo or pianissimo—
the volume is up to you.

4. PLAY SONG CONTROL Press to play the next song. And the next. And the next. Toggle from song to song. See included Lyric Playbill for song order.

5. STOP SONG CONTROL Stop the current song and queue the next. You're the boss. REPLAY BUTTON
 Press replay and play it over and over again, little Beethoven.

DEMO
 Plays a loop of songs illustrating the beautiful
 music you can make with Symphony No. 2.

8. EARPHONE JACK
Hit the earphones, Jack! Moms need
a little peace and quiet now and then.

## This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

 $\label{lem:caution:changes} Caution: changes or modifications not expressly approved by the party responsible$ for compliance could void the user's authority to operate the equipment

 $\label{eq:NOTE:normalisation} \textbf{NOTE:} \textbf{ This equipment has been tested and found to comply with the limits for a}$ Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.
   Connect the equipment into an outlet on a circuit different from
- that to which the receiver is connected.
- $\bullet$  Consult the dealer or an experienced radio/TV technician for help.

Congratulations! You read through all of that tiny text? Your eyes are very good, and your patience is admirable.
